

Dear Sir/Madam,

For years now, FAKRO has been taking care of the natural environment and supporting environmentally friendly solutions. Therefore, we communicate that our obligations are **not only the formal implementation of the environmental management system** in accordance with the requirements of EN ISO 14001:2015 standard, but also an **important part of our philosophy**, known as **GO GREEN**.

The green colour present in the FAKRO logo is with us since the very beginning of the Company's existence, while ecology associated with it is an aspect that permeates all stages of our development. Everything we do is always with the better future of our children in mind. This is exactly the philosophy of GO GREEN at FAKRO. We design, plan and produce with care for the natural environment. Offering eco-friendly and energy-efficient products has been encoded in the DNA of FAKRO. We ensure that every process, every action and every decision we make is always accompanied by concern for the comfort and healthy life of future generations. We have now closed all these activities in this one important GO GREEN philosophy.

We encourage you to read the content of **FAKRO ENVIRONMENTAL POLICY**.

FAKRO ENVIRONMENTAL POLICY

The FAKRO Company, specialised in the production and sale of roof windows, loft ladders and other products ensuring living comfort, is one of the most innovative companies in the construction industry. Since the beginning of its inception, the Company has placed special emphasis not only on the development and quality of its products, but also on environmentally friendly solutions.

Being aware of the impact of our activities on the natural environment, we undertake measures to prevent negative influence on the environment.

At the same time, we commit ourselves to:

- Reduce the amount of waste generated as well as water and energy consumption.
- Limit the emission of pollutants to air and water that result from technological processes and transport.
- Continuous improvement.
- Compliance with legal requirements relating to the environment and other regulations and requirements concerning the Company.
- Carry out regular activities that result from specific environmental aspects.
- Promote environmental awareness among employees.

GO GREEN

These obligations are implemented as part of the environmental management system in accordance with the requirements of EN ISO 14001:2005 and will be fulfilled by:

- Setting environmental objectives and tasks.
- Collecting, sorting and, where possible, reusing or transferring waste to authorised recipients.
- Modernising processes and equipment as well as investments aimed at reducing negative impacts on the environment.
- Designing products in such a way that their impact on the environment can be minimised at different stages of their life.
- Developing emergency procedures to be followed in the event of accidents that may lead to environmental contamination.
- Monitoring key characteristics that impact the environment.
- Rational use of raw materials, electricity, heat, fuel and water.
- Regular employee trainings.
- Compliance with legal requirements and other environmental protection guidelines.
- Using renewable energy sources (eg. cultivation of energy willow, installation of photovoltaic panels).
- Providing resources to achieve environmental objectives.

We ensure that this Environmental Policy is understandable, implemented, communicated to employees and publicly available to interested parties. The Management Board of the Company declares its commitment to the implementation of the Environmental Policy.

Management Board of FAKRO
